	Expand Public Information Campaign	Partnering with the Mayor's Office, LADWP is running the "Save the Drop" Focused Outreach Campaign which includes conservation messaging through radio, television, print, and ads on bus tails, bus benches, and bus shelters.
	Provide Rebates on Plumbing Fixtures and Devices	LADWP offers a wide variety of rebates for its commercial and residential customers which includes toilets, clothes washers, showerheads, aerators, and rain barrels & cisterns.
	Provide Rebates for Landscape Irrigation Efficiency	LADWP offers its commercial and residential customers rebates for efficient sprinkler nozzles, weather based irrigation controllers, and moisture sensor systems.
	Provide Rebates for Turf Replacement	LADWP provides a rebate to commercial and residential customers who remove turf and replace with California Friendly landscaping. To date, LADWP has removed over 32 million square feet of turf through these programs.
	Reduce System Water Loss	LADWP completed its Water Loss Audit and Component Analysis Study in 2013 and has formed a Water Loss Task Force comprising of over 100 staff. The Task Force has evaluated the Study's recommendations and has begun implementing cost-effective strategies to further reduce water loss.
	Increase Water Waste Patrols	LADWP has a Water Conservation Response Unit, a dedicated conservation enforcement team, which comprises of 6 full-time staff that responds to water waste reports and patrols the City for water waste violations.

	Offer Water Use Surveys	LADWP offers its customers water use surveys to identify strategies to reduce their water use. LADWP has also sent out water conservaiton letters to its top 1% residential water users. The letters remind customers on the importance of conserving during the drought, and offers these customers a water audit by LADWP staff to identify measures they can take to reduce water use.
	Decrease Line Flushing	In response to water shortage conditions, LADWP has kept main flushing to a minimum.

NOTES: LADWP service area population is based on DOF estimates with the following adjustments:	
<u>Addition</u> The areas outside the LA City boundary, but served by LADWP, were delineated using GIS. Population information for each of the delineated areas was taken from US census data at the block level for the years 1990, 2000, and 2010. This population remained fairly stable over this period of time at around 32,600 people. The initial estimate of 28,000 people was established more than 20 years ago. Based on the recent study, this adjustment was increased by 4,600 people starting from 2010.	
<u>Subtraction</u> The population living within the City of LA but served by others was determined by surveying City housing units that are not reachable by LADWP's service lines. This population also remains fairly constant at 2,000 people.
