STREAM FLOW MEASUREMENT THROUGH ICE

This is a measurement being made of the flow of a stream whose surface is completely covered by solid ice. The hydrographer has chopped an elongated opening through the ice and, using the ice as a bridge, is measuring the velocity of flow at various points along the cross section. The flow in the stream is relatively small, the usual case under frozen over conditions; so the hydrographer is using a pygmy meter.

The stream gaging station where this measurement is pictured is Eagle Creek at Eagleville. Eagle Creek rises at its source on Eagle Peak, highest peak of the Warner Range in northeastern California, and flows easterly about six miles into Middle Alkali Lake in Surprise Valley. The gaging station is about midway between the source and outlet.

This photograph was taken on January 26, 1960. The hydrographer is Paul E. Simpson of the California State Department of Water Resources.

WATER UTILIZATION SUMMARY 142

WILLIAM E. WARNE
DIRECTOR

EDMUND G. BROWN
GOVERNOR

ADDRESS REPLY TO
P. O. BOX 388 SACRAMENTO 2
1120 N STREET HICKORY 5-4711

STATE OF CALIFORNIA
Department of Water Resources

SACRAMENTO

May 10, 1961

Honorable Edmund G. Brown, Governor,
and Members of the Legislature
of the State of California

Gentlemen:

I have the honor to transmit herewith Bulletin No. 23-59, "Surface Water Flow for 1959". The basic data of stream flow, water stages, diversions, utilization, and salinity are presented in this report on an areal basis in accordance with the subdivision of the State into hydrographic areas.

This report continues the publication of water flow and utilization data collected and published as part of the Sacramento-San Joaquin Water Supervision Program. It also includes the daily mean and crest stages data formerly published in "Flood Flows and Stages in Sacramento and Northern San Joaquin Valleys".

Sincerely yours,

A handwritten signature in cursive script that reads "William E. Warne".

Director

FOREWORD

This report presents to the user the extensive and varied basic hydrographic data resulting from thousands of measurements and observations of surface water flow and usage.

The three predominant types of data - stream flow, diversions, and daily mean and crest stages - are presented for time periods related to their occurrence and use: viz., stream flow, for the water year (October 1, 1958, through September 30, 1959); diversions, for the diversion period November 1, 1958, through October 31, 1959, which includes the agricultural season of the 1959 calendar year; and daily mean and crest stages, for the period November 1, 1958, through June 30, 1959, encompassing the interval of high water flows occurring in California streams.

ACKNOWLEDGMENT

A large amount of the basic data presented in this report was necessarily obtained with the cooperation and assistance of many individuals, corporations, political subdivisions, and governmental agencies. It is gratifying to receive and to acknowledge this assistance. The fact that the assistance has been whole-hearted and objective is evidence of the interest shown in the water supplies of California and the importance given to this vital commodity by these agencies.

STATE OF CALIFORNIA
DEPARTMENT OF WATER RESOURCES

EDMUND G. BROWN, Governor
WILLIAM E. WARNE*, Director of Water Resources
ALFRED R. GOLZE, Chief Engineer

DIVISION OF RESOURCES PLANNING

WILLIAM L. BERRY Division Engineer
IRVIN M. INGERSON Chief, Project Development Branch

Activities covered by this report are under the direction
of

WILLIAM L. HORN**. Chief, Hydraulic Section

The surface water program is under the supervision
of

Floyd I. Bluhm Senior Engineer, Water Resources

Assisted by

Edward J. Labrie Senior Engineer, Water Resources
Office Engineer

Joseph L. Clause Water Resources Engineering Associate
Field Operations

Grant Ardell Water Resources Engineering Associate
Coordinator of Diversion Activities

Correlation and compilation of hydrographic data
were supervised by

Cledith L. Chastain Water Resources Engineering Associate

INTRODUCTION

This bulletin presents data of Surface Water flow in California for the water year October 1, 1958, through September 30, 1959. It contains a record of information collected and assembled by the Department of Water Resources in the Central Valley Area, the North Coastal Area, and the Lahontan Area as shown on Plate 1. This volume is one of a series of annual reports.

"Report of Sacramento-San Joaquin Water Supervision", was published annually from 1924 through 1955. Current data as published in that bulletin is now included as a part of this publication. Data appearing in the same form published from 1913 through 1956, in "Flood Flows and Stages in Sacramento and Northern San Joaquin Valleys" is also included as a part of this bulletin.

The objective in publishing this report is to bring together, in a permanent and usable form, all surface flow data gathered by the Department of Water Resources. Other relevant data is added for the convenience of the user.

The field work necessary for this bulletin includes (1) construction and maintenance of stream gaging stations, (2) measurements of flows and stages in streams, and of return flows to these streams, either through drainage pumps or by gravity drains, and (3) determination of amounts and usage of water diverted by individual users. The amounts of water diverted by the users are determined by calibrating suitable measuring devices at all points of gravity diversion, by rating the capacity of each diversion pumping plant, and collecting data for hours of operation.

The related office work consists of compilation and computation of field data for presentation in report form. The computation of stream flow and drainage involves the conversion of the daily gage height records to quantities of daily flows in second-feet and monthly runoff in acre-feet. Water diversion computations involve the conversion of diversion records to quantities of monthly diversions in acre-feet.

Definition of Terms

A list of definitions of terms as used herein follows:

Second-foot or cubic foot per second is the unit rate of discharge of water. It is a cubic foot of water passing a given point in one second.

Acre-foot is the quantity of water required to cover one acre to a depth of one foot and is equivalent to 43,560 cubic feet or 325,850 gallons.

Drainage area for a given stream above a given point (e.g. a gaging station) is the area enclosed by a topographic divide in which all surface runoff will drain by gravity into the stream above the specified point.

Unimpaired runoff is the flow that would occur naturally at a point in a stream if there were: (1) no upstream controls such as dams and reservoirs; (2) no artificial diversions or accretions; and (3) no changes in ground water storage resulting from

development. Unimpaired flow is computed from measured runoff by allowing for man-made changes in the natural conditions.

Water year is the 12-month period from October 1 of any year through September 30 of the subsequent year, and is designated by the calendar year in which it ends.

Consumptive use refers to the water transpired, evaporated, and used in promoting vegetative growth and to the water evaporated from adjacent soil and water surfaces.

TABLES

The tabular data presented herein are divided into five categories: stream flow, flood period stage, diversions and acreages irrigated, summary, and supplementary tables. Gaging stations added to and deleted from the network during the year are presented in Tables 2, 25, and 357. A list of measurements at miscellaneous sites are shown in Tables 17, 175, and 369.

Flow data for 65 stations published, in U. S. Geological Survey Water Supply papers and previously included in the Bulletin 23 series, have not been included in this bulletin. Stage data for 37 of these stations will, however, continue to be published. A list of stations added or deleted is contained in the "Tables of Additions or Deletions" presented with each hydrographic area.

Certain tables in this report contain data received entirely from agencies other than the Department of Water Resources. These data are published as they are received from the publishing agency. Other tables contain data collected and compiled by the Department of Water Resources, together with material from other agencies. All the data have been rounded to the number of significant figures as shown in the tabulation under "Stream Flow".

Stream Flow

The stream flow tables are arranged for each stream or stream system in downstream order. All stations on a tributary stream entering above a main stem station are listed before that station. Stations on a tributary entering between two main stem stations are listed between those stations. Included with the stream flow tables are tables showing reservoir content in acre-feet. A stream gaging station is given its name from that of the nearest post office (Feather River at Yuba City) or well-known landmark (San Joaquin River at Fremont Ford Bridge).

All stream flow data reported herein are derived through the use of mechanical, arithmetical and empirical operations and methods. Since the results are affected by inherent inaccuracies in the procedures and equipment used, it becomes necessary to establish limits of accuracy for which the data are reported.

The following is a listing of significant figures used in reporting stream flow data:

1. Daily flows	second-feet
0.0 - 9.9	Tenths
10 - 99	2 significant figures
100 - up	3 significant figures
2. Means	Second-feet
0.0 - 99.9	Tenths
100 - 999	3 significant figures
1000 - up	4 significant figures

The water year totals are reported to a maximum of four significant figures.

Flood Period Stage

Two types of daily data are presented on the height or stage of water surface; (1) for streams subject to tidal influences daily maximum and minimum gage heights; (2) for those streams beyond tidal influence, daily mean gage height, or an average of one or more daily staff-gage or wire-weight gage readings. Of the 128 stations for which daily stages are presented in this report, 24 have computed daily mean flow. This data is included in the stream flow tables.

Gage heights for stage tables are read in the field or computed from recorder charts and are reported to the tenth of a foot.

Daily gage heights, in feet, are tabulated for each day of the period from November 1 through June 30. The elevation of the water surface at the gaging station may be obtained by adding the gage height readings to the elevation of the gage datum presented in Tables 1, 24 and 356.

Diversions and Acreages Irrigated

These tables show the water diverted during the period from November 1 through October 31 and the acreage irrigated. While the major use of water is for agriculture, small amounts that are diverted for municipal and industrial use also are reported.

Because of the intermittent operation of most diversion facilities, the monthly diversion values are reported in acre-feet to three significant figures. The totals for individual water users and stream reaches are reported to four significant figures.

The amount of water applied varies with the crop grown. However, as the amount of water applied for the production of rice may be as much as twice the average applied to other crops, irrigated acreage data is presented for rice separately.

Summary

Stream Flow, Diversions and Accretions. The relationship between water supply and diversions is inherent in the consideration of water conditions. This is of particular consequence during years of subnormal runoff, when the demand may equal or exceed the supply. Tables 22 and 23 bring together water supply and water demand factors for the Sacramento and San Joaquin Rivers and tributaries. Water supply consists of stream flow and flow from drains. Demand is represented by diversions for irrigation. Quantities of unmeasured accretions from such factors as release from bank storage, evaporation, return flow, unmeasured minor tributaries, and other related factors are also included.

These summary tables show quantities which vary greatly in magnitude. Therefore, for ease of use, all quantities are rounded off to thousands of acre-feet. If a more detailed analysis of a stream or reach is required, reference should be made to the individual stream flow or diversion table. Reference numbers are shown in the column preceding the monthly figures.

Water Supply and Utilization, Sacramento-San Joaquin Delta. The complexity of waterways, tidal action, seepage, and methods of agricultural water use results in hydrologic problems which preclude normal methods of measuring water supply and water use in the Sacramento-San Joaquin Delta.

The correlation of water supply and use for the Delta Service Area, divided into uplands and lowlands, is shown in Table 21. The water supply available to the area is determined from 13 gaging stations, listed under "Water Supply" in the table, and from 42 precipitation stations in the area. "Water Utilization" in the same table includes agricultural use, evaporation, exportations through the Delta-Mendota and Contra Costa Canals, and diversions for the City of Vallejo. Agricultural use in the uplands is determined by direct measurement of diversions; however, in the lowlands, because it cannot be measured directly, agricultural use is computed by unit values of consumptive use of the various crops multiplied by their acreages. Unit values of consumptive use were derived from early experimental work by the University of California and California Extension Service. Crop acreages are determined by periodic land use surveys. Values used in this report were determined from a survey made in 1955.

Annual Comparative Monthly Diversions. Summaries of diversions, by streams for the last 10-year period are given in Tables 178 through 188. The data are given for each month in acre-feet, cubic feet per second, and the monthly percentage in relation to the seasonal total. Data in Table 177 is correlated with the data from Tables 178 through 188 by a comparison with the 10-year average use for each stream. The diversions and acreages irrigated from the Sacramento River above Sacramento for the last 10 years is summarized in Table 189.

A seasonal summary of water utilization in the Sacramento-San Joaquin Valley during the last 10-year period, is presented in Table 176. The gross duty tabulated for the March through October irrigation season shows both the amount of water diverted in acre-feet per acre irrigated and the average number of acres irrigated for each second-foot of water diverted.

Supplementary Tables

The supplementary tables include a description of gaging stations, precipitation data, runoff comparisons, and salinity of streams.

Gaging Station Description. Tables 1, 24 and 356 provide station descriptions and supplemental current and historical data for each gaging station reported. Each gaging station is referenced to a well established datum plane elevation wherever such datum is known. Some gages are referenced only to arbitrarily assumed local datum planes, denoted as "local" in the reference datum column. All gage heights are in feet.

Precipitation. Table 18 presents the monthly precipitation data for the water year, for several stations in the Sacramento and San Joaquin Valleys, from Shasta Dam to Fresno. The stations give a broad and general indication of the rainfall on the floor of the Central Valley.

Runoff Comparisons. The relative magnitude of runoff occurring on any one stream for a given year may be shown as the ratio of the runoff of that year with the average runoff of the stream and expressed as a percentage. For this report, the average unimpaired runoff is computed for the 50-year period October 1907 through September 1957. Table 19 presents, for the major streams of the Central Valley Area, the 1958-59 monthly unimpaired runoff expressed as a percent of the 50-year average monthly unimpaired runoff. Table 20 shows the unimpaired average annual runoff for the same streams and the percentage of the 50-year average unimpaired runoff for each water year from 1919-20 through 1958-59.

Salinity. Table 225 lists the salinity sampling stations within the Sacramento-San Joaquin Delta. The stations are listed beginning with the Golden Gate as zero miles and proceeding upstream through the bay system to the delta area. The salinity samples are taken, when possible, at four-day intervals and at one and one-half hours after high-tide. The observed concentrations of salinity are given in Table 227. The locations of these stations are shown on Plate 2, together with the limit of maximum seasonal encroachment of salinity of 1000 parts of chloride per million parts of water for the current water year and for other water years of historical interest.

DEPARTMENT REPORTS OF BASIC WATER RESOURCE DATA

Reports issued annually by the Department of Water Resources to record basic hydrologic data and to present conditions of water supply include the following:

Bulletin Series No.Name

23	Surface Water Flow (Formerly Sacramento-San Joaquin Water Supervision)
39	Water Supply Conditions in Southern California
65	Quality of Surface Waters in California
66	Quality of Ground Waters in California
77	Ground-Water Conditions in Central and Northern California
--	Water Conditions in California (Published in February, March, April, and May of each year.)

NORTH COASTAL AREA

NORTH COASTAL AREAIntroduction

The North Coastal Area extends for about 270 miles along the coast from the California-Oregon line south to the northern boundary of the Lagunitas Creek basin in Marin County. It ranges in width from 180 miles at the Oregon boundary to 30 miles in the southern portion. The topography of the area is predominantly mountainous, with many peaks above 6,000 feet. Mount Shasta, at elevation 14,161 feet, is the highest peak in the region. Stream flow is sustained through the summer and early fall by ground water seepage from a thick, absorptive soil mantle.

Tabular Information

On the following pages are the data for 14 gaging stations for the 1959 water year.

TABLE 17

STREAM FLOW MEASUREMENTS AT MISCELLANEOUS SITES
 Measurements of streamflow at points other than gaging stations or at points where flow has not been computed
 are listed in the following table

North Coastal Area

Stream	Tributary	Location	Measurements		
			Date	Gage Height	Discharge (c.f.s.)
Shaata River at Edgewood Bridge (R)	Klamath River	NW $\frac{1}{4}$ Sec. 20, T42N, R5W	11-12-58	1.46	30.7
			12-15-58	1.39	28.1
			1-12-59	4.02	738
			1-28-59	2.18	112
			3-18-59	1.76	62.9
Willow Creek Diversion nr Gazelle (S)	Klamath River	NE $\frac{1}{4}$ Sec. 19, T42N, R6W	5-12-59	0.38	2.48
			6- 2-59	0.28	1.86
			7- 9-59	1.23	0.70
			9- 1-59	0.81	0.09
Sugar Creek Diversion nr Callahan (A)	Klamath River	SW $\frac{1}{4}$ Sec. 12, T40N, R9W	10- 2-58	4.98	2.89
			7- 9-59	4.74	2.14
			8- 4-59	4.77	1.18

(A) Referred to Recorder Station "Sugar Creek near Callahan".
 (R) Recorder Installation.
 (S) Staff only.

CENTRAL VALLEY AREA

CENTRAL VALLEY AREAIntroduction

The Central Valley Area is the locale of five important hydrologic features that focused early attention on the need for gathering basic data of water occurrence and utilization. These features are:

1. The existence of the two large river systems, namely the Sacramento and San Joaquin Rivers.
2. The occurrence and development of the extensive agricultural lands contiguous to these river systems.
3. The complexities of the delta channels at the confluence of these two river systems.
4. The climatic conditions which result in low flows during much of the agricultural season and, in dry years, critical water shortages.
5. The intrusion of saline waters into the delta area during periods of low stream flows.

The development of the Central Valley Project and the accelerated participation of the State in water development construction have increased and broadened the need for, and the value of, data on surface water flow. Most of the tributary streams throughout the entire Sacramento-San Joaquin Valley, including much of the foothill area, are now reported upon, either by the State or the U. S. Geological Survey. This coverage encompasses both measurements of stream flow and measurements of diversions.

Tabular Information

On the following pages are tables of stream flow, stages, diversions and acreages irrigated, summaries of the foregoing, and supplementary data for the 1959 water year.

* Average unimpaired runoff in thousands of acre-feet computed from the 50 year period October 1907 through September 1957.

(a) Figures were computed from summations of unimpaired runoff of foothill stations or major tributaries only and do not include runoff from minor tributaries and from valley floor.

a Water supply from precipitation has been computed using weighted mean rainfall and the acreage of the Delta Service Area.

b Consumptive use in the Delta Lowlands has been computed using monthly unit consumptive use factors for classified vegetation and evaporation. Acreage data obtained through the Land Use Surveys of 1952 and 1955. Revised August 1960.

Note: The unmeasured accretions between gaging stations were computed by subtracting the measured inflows to a reach from the sum of the measured diversions and the measured outflows from that reach. Unmeasured stream flow for periods of no record are included in the unmeasured accretions.

- * Not included in computations of unmeasured accretions.
a Computed for irrigation season only.
b Includes diversions from Stony Creek by Glenn-Colusa Irrigation District.
c Includes diversions from Feather River below Nicolaus.
d Includes diversions from American River below "H" Street Bridge.
e Includes diversions from Yuba River below Mile 5.2.
f Includes diversions from Bear River below Wheatland.

Station located 0.7 mi. below Little Butte Creek, 7.5 mi. E of Chico. Flow slightly regulated by storage in Magalia Reservoir. Considerable importations above station from West Branch Feather River via power plants. Records furn. by U.S.G.S. Drainage area is 148 sq. mi. (s)															
BUTTE CREEK NEAR DURHAM															
39 40 37	121 46 38	NW17 21N 2E			5100	8.72	2/16/59			JAN 58-DATE	JAN 58-DATE	1958		181.01	USED
Station located 0.1 mi. below Ord-Chico Highway bridge, 2.6 mi. NE of Durham. Tributary to Butte Slough. Station installed December 11, 1958. (f)															
BUTTE SLOUGH AT MAWSON BRIDGE															
39 11 14	121 54 28	SW31 16N 1E	29400	2/19/59		68.9	3/ 1/40	577800	6316000	JAN 39-DATE	NOV 34-MAY 37# OCT 37-DATE	1934		0.00	USED
Formerly published as Butte Slough to Sutter Bypass. Station located at West Butte-Meridian Highway bridge, 3.0 mi. N of Meridian. Tributary to Sutter Bypass. Flow affected by gate operation. Flow during summer months is made up almost entirely of return water from lands irrigated by Feather River diversions. During flood periods, Sacramento River water enters Butte Basin above Butte City by bank spill and spill over Moulton and Colusa Weirs. (fs)															
BUTTE SLOUGH AT OUTFALL GATES															
39 11 44	121 56 04	NE35 16N 1W						127800	86640	JUN 24-OCT 38# JAN 39-DATE	JUN 24-DATE			0.00	USED
Formerly published as Butte Slough to Sacramento River. Station located 4.0 mi. E of Colusa, Meridian. Tributary to Sacramento River. Flow regulated by gravity culverts. These flows, together with flow of Butte Slough at Mawson Bridge and Wadsworth Canal at Butte House Road area, during the summer months, made up almost entirely of return water from lands irrigated by Feather River diversions. (fs)															
CACHE CREEK AT YOLO

Station located 0.7 mi. below So. Fork American River, 2.3 mi. NE of Folsom. Usable capacity, 1,000,000 ac.-ft. between elevations 205.5 and 166.0 ft. above mean sea level, practically all of which is available for release. Spillway design flood pool elevation, 475.4 ft. (capacity, 1,120,000 ac.-ft.) Figures given herein for daily content represent usable content. Inflow to Folsom Reservoir takes into account change in storage, release, spill, precipitation, and evaporation, and is representative of the natural flow which would pass the dam site if the dam had not been constructed. Figures shown under total discharge are computed inflow to the reservoir. Period of record for computed inflow as shown under period of record for discharge. Period of record for daily content is shown under period of record for stage. Records furnished by U.S.B.R. Drainage area is 1,875 sq. mi.

OLD RIVER NEAR ROCK SLOUGH															
37 59 25	121 34 49	SW30 2N 4E	8.1	2/16/59	10.0	12/26/55	10.0	12/26/55			MAR 45-DATE	1945 1947	-3.0 0.00	USGS USED	
Station located on American Island (formerly Holland Tract), 1.2 mi. N of Rock Slough, 4.7 mi. NE of Knightsen. Station affected by tidal action. Maximum gage height listed does not indicate maximum discharge. U.S.E.D. datum referred to head of Snodgrass Slough. (s)															
OLD RIVER NEAR TRACY ROAD BRIDGE															
37 48 18	121 26 53	SW32 1S 5E	9.3	2/21/59	13.2	12/29/55	13.2	12/29/55			DEC 57-DATE	1957	0.00	LOCAL	
Station located 30 ft. above Tracy Road bridge, 3.5 mi. NW of Tracy. Prior to January 23, 1959, station located at Galli's Pump, approx. 0.2 mi. above Tracy Road bridge. Station affected by tidal action. Maximum gage height listed does not indicate maximum discharge. (s)															
ORESTIMBA CREEK NEAR CROWS LANDING															
37 24 59	121 00 45	SW 8 6S 9E	3410E	2/16/59	12.81				18670		DEC 57-DATE	1957	0.00	LOCAL	
Station located 0.1 mi. below River Road bridge, 3.7 mi. NE of Crows Landing. This includes drainage returned to San Joaquin River. Backwater from San Joaquin River at times affects stage-discharge relationship. Recorder installed December 20, 1957. (f)															
OWENS CREEK BELOW OWENS RESERVOIR															
37 18 28	120 11 35	SW23 7S 16E	63		590	12/24/55	1251	11920			FEB 50-DATE	1950	338.22	USGS	
Station located 0.25 mi. below Owens Dam. Tributary to San Joaquin River via Mariposa Creek and Bear Creek. Flow regulated by Owens Reservoir. Records furnished by U.S.C.E. Drainage area is 25.6 sq. mi. (f)															
PANOCHÉ DRAIN NEAR DOS PALOS															
36 55 25	120 41 19	NW 5 12S 12E			3.78	5/ 2/59					FEB 59-DATE	1959	0.00	LOCAL	
Station located midway between outside and main canals 0.5 mi. S of main canal levee road, 5.6 mi. SW of Dos Palos. This is drainage returned to San Joaquin River. Backwater from San Joaquin River at times affects stage-discharge relationship. During these periods there is insufficient data to compute flow. Record installed February 25, 1959. (f)															
PINE CREEK NEAR ALTURAS															
41 25 59	120 26 32	SW35 42N 13E	102	2/16/59	109	5/21/58	10290	19580			NOV 57-DATE	1957	0.00	LOCAL	
Station located approx. 0.1 mi. N of road, 6.1 mi. SE of Alturas. Tributary to Pit River. Stage-discharge relationship at times affected by ice. (f)															
PIT RIVER BELOW ALTURAS															
41 28 54	120 38 25	NEL3 42N 11E	336	2/17/59	2190E	2/25/58	58990	240700			OCT 57-DATE	1957	0.00	LOCAL	
Station located at county road bridge, 5 mi. W of Alturas. Stage-discharge relationship at times affected by temporary diversion dam approx. 1/2 mi. below station and also by ice. During periods of backwater effect by dam, flow listed is not considered to have the same degree of accuracy as other records published in this report. Flow is regulated by many small reservoirs. (f)															

E - Estimated (s) - Record of stage published (f) - Record of flow published # - Flood season only

Ø - Irrigation season only

Station located 0.6 mi. below Keswick Dam, 1.5 mi. below Keswick. Flow regulated by Shasta Lake. Records furnished by U.S.G.S. Drainage area, excluding Goose Lake basin, is approx. 6,710 sq. mi. (s)												
SACRAMENTO RIVER AT KNIGHTS LANDING												
38 48 10	121 42 55	NEL14 11N 2E	37.63	2/20/59	296000	41.83	2/22/58 2/8/42					
Station located just above the Southern Pacific Railroad bridge, 13.1 mi. above Feather River immediately NE of Knights Landing. Station affected by backwater from Feather River and Sutter Bypass during periods of high flow. Maximum discharge of record listed is for period 1940 to date. Records furnished by U.S.G.S. Maximum gage height listed does not necessarily indicate maximum discharge. (s)												
SACRAMENTO RIVER AT MERIDIAN												
39 08 42	121 55 00	SE13 15N 1W	59.14	2/18/59		64.4	3/1/40					
Station located 190 ft. below Meridian Bridge, State Highway 20, immediately NW of Meridian. Flow computed for irrigation season only. (fs)												
SACRAMENTO RIVER AT MOULTON WEIR												
See Moulton Weir Spill to Butte Basin. Gage heights below weir crest (76.80 ft.) are not tabulated.												
SACRAMENTO RIVER OPPOSITE MOULTON WEIR												
39 20 13	122 01 50	SW12 17N 2W	80.08	2/17/59		85.5	2/7/42					
Station located immediately W of weir, 4.8 mi. S of Princeton. Flow computed for irrigation season only. (fs)												
SACRAMENTO RIVER NEAR MOUNT SHASTA												
41 16 00	122 18 38	SE33 40N 4W			958	4.88	4/25/59					
Station located 1.5 mi. SW of junction of State Highway 89 and U. S. Highway 99, 3 mi. S of Mount Shasta. Recorder installed April 21, 1959. (f)												
SACRAMENTO RIVER AT ORD FERRY												
39 37 39	121 59 28	SE32 21N 1W	109000E	114.80	2/17/59	370000	121.7	2/28/40	7516000	17690000		
Station located 0.1 mi. below Ord Ferry. Records of flow in excess of 70,000 c.f.s. are based on extension of rating curve and correlation with adjacent gaging stations because of inability to measure flow above this figure. (fs)												
SACRAMENTO RIVER AT PRITCHARD LAKE												
38 43 51	121 36 07	SE12 10N 3E										
Staff located at Reclamation District 1000 pumping plant, 3.9 mi. S of Verona. Gage read daily by pump operators. (s)												

E - Estimated
(s) - Record of stage published
8 - Irrigation season only
- Flood season only
(f) - Record of flow published

39 04 08	121 51 43	NE16 14N 1E	SACRAMENTO RIVER AT RECLAMATION DISTRICT 70 PUMPING PLANT															
			Staff located at district pumping plant, 1.7 mi. E of Grimes. Gage read daily by pump operators. (s)															
38 52 58	121 48 59	SW13 12N 1E	SACRAMENTO RIVER ABOVE RECLAMATION DISTRICT 108 PUMPING PLANT															
			Station located below Tyndall Landing, 2.5 mi. NW of district drainage pumping plant, 6.2 mi. W of Robbins. Flow computed for irrigation season only, based on correlation with adjacent gaging stations and should not be considered to have the same degree of accuracy as other records published in this report. (f)															
40 10 43	122 13 45	SW20 27N 3W	21.8	2/16/59	32.2	2/28/40												
			Station located at E end of U. S. Highway 99E bridge, immediately E of Red Bluff. Prior to November 1957 staff gage readings at same location. (s)															
40 13 55	122 10 50	SE34 28N 3W	19.41	2/16/59	291000	2/28/40												
			Station located at lower end of Iron Canyon, 0.5 mi. below Sevenmile Creek, 4.6 mi. NE of Red Bluff. Records prior to January 1902 at a site 16.2 mi. upstream. Records furn. by U.S.G.S. Drainage area, excluding Goose Lake basin, is approx. 9,300 sq. mi. (s)															
40 32 19	122 21 20	SEL8 31N 4W	48.98	1/28/59														
			SACRAMENTO RIVER NEAR RED BLUFF															
			Station located below diversion dam of Anderson-Cottonwood Irrigation District, 300 ft. above Churn Creek pumps, 3.7 mi. SE of Redding. Flow regulated by Shasta Lake. Flow computed for irrigation season only. (f)															
38 08 42	121 41 30	SW31 4N 3E	8.6	2/16/59	10.0	12/26/55												
			SACRAMENTO RIVER AT RIO VISTA															
			Station located on dock at U. S. Engineers Transportation Depot, 1.1 mi. below the Rio Vista Bridge. Station affected by tidal action. Maximum gage height listed does not indicate maximum discharge. (s)															
38 51 45	121 47 29	NE30 12N 2E																
			SACRAMENTO RIVER NEAR ROUGH AND READY BEND															
			Staff located at Reclamation District 108 drainage pumping plant, 4.5 mi. E of Robbins. Gage read at least twice daily by pump operators. (s)															
38 35 20	121 30 15	NW35 9N 4E	67400	2/20/59	104000	30.14	11/21/50	11980000	24570000									
			Station located 1,000 ft. above the I Street Bridge, 0.5 mi. below the American River. This represents the flow of the Sacramento River past Sacramento into the Delta. Additional Sacramento River water reaches the Delta via Sacramento Weir and Tolo Bypass near Woodland. Below about 35,000 c.f.s., the stage-discharge relationship is affected by tidal influence. Maximum discharge of record listed is for period 1921, 1948 to date. Records furn. by U.S.G.S. (fs)															

E - Estimated
(s) - Record of stage published

f - Irrigation season only

- Flood season only
(f) - Record of flow published

Station located 0.3 mi. below Wilkins Slough pumping plant of Reclamation District 108, 1.3 mi. below Tisdale Weir, 6 mi. SE of Grimes. Maximum discharge of record listed is for period 1938 to date. Records furn. by U.S.G.S. (s)															
SACRAMENTO SLOUGH AT SACRAMENTO RIVER															
38 46 52	121 38 27	SE21 11N 3E	35.88			2/19/59			JUN 24-OCT 398 JAN 40-DATE	APR 45-DEC 468 APR 47-DATE					
Station located 0.5 mi. above mouth, 4.6 mi. SE of Knights landing. During low flows this represents combined flows of Sutter Bypass and Reclamation District 1500. During High flows the slough is entirely submerged as it lies within the bypass area. Sharp rises in the Sacramento River cause zero or negative flow. (f)															
SACRAMENTO WEIR SPILL TO YOLO BYPASS															
			280	118000E	32.8	2/20/59	1831	94150	26-DATE						
See Sacramento River at Sacramento Weir and Sacramento River opposite Sacramento Weir for stage records and locations. Elevation of fixed crest of weir is 75.0 ft. U.S.E.D. datum; elevation of movable crest (top of needles) is 31.0 ft. U.S.E.D. datum. There are 48 gates, each 38 ft. in length. Flow listed is leakage through gates. Gates not opened during year. (f)															
SALT CREEK NEAR BELLA VISTA

Publication of Stream Flow Discontinued on the Following Stations (contd.)
 (See U. S. Geological Survey water supply paper for stream flow publication)

- Cow Creek near Millville
 - Deer Creek near Smartville
 - (a) Deer Creek near Vina
 - Dry Creek near Galt
 - Dry Creek at Virginia Ranch
 - (a) Dry Creek near Wheatland
 - Elder Creek at Gerber
 - (a) Feather River at Nicolaus
 - (a) Feather River near Oroville
 - Fresno River near Daulton
 - Kaweah River near Three Rivers
 - Kings River at Piedra
 - Little Dry Creek at mouth near Friant
 - Merced River at Exchequer
 - Merced River near Stevinson
 - Merced River Slough near Newman
 - (a) Mill Creek near Los Molinos
 - (a) Mokelumne River near Clements
 - Mokelumne River at Lancha Plana
 - (a) Mokelumne River at Woodbridge
 - Orestimba Creek near Newman
 - Paynes Creek near Red Bluff
 - Putah Creek near Davis
 - (a) Putah Creek near Winters
 - (a) Sacramento River at Butte City
 - (a) Sacramento River at Colusa
 - (a) Sacramento River at Keswick
 - (a) Sacramento River at Knights Landing
 - (a) Sacramento River near Red Bluff
 - (a) Sacramento River at Verona
 - (a) Sacramento River below Wilkins Slough
 - Salt Slough near Los Banos
 - San Joaquin River near Biola
 - (a) San Joaquin River at Fremont Ford Bridge
 - San Joaquin River below Friant
 - (a) San Joaquin River near Newman
 - (a) San Joaquin River near Vernalis
 - South Honcut Creek near Bangor
 - Stanislaus River below Melones Power House
 - (a) Stanislaus River at Ripon
 - Stony Creek at Black Butte Dam Site near Orland
 - (a) Stony Creek near Hamilton City
 - (a) Tomes Creek at Paskenta
 - Tule River near Worth Bridge near Porterville
 - Tule River near Porterville
 - Tuolumne River above La Grange Dam near La Grange
 - (a) Tuolumne River at Modesto
 - (a) Yolo Bypass near Woodland
 - (a) Yuba River at Englebright Dam
 - (a) Yuba River at Marysville
- (a) Stage record published. (See alphabetical index)

- a This acreage also received an undetermined amount of well water.
- b Formerly listed as A. A. Casselman.
- c 115 acres listed for Mile 7.7R also received an undetermined amount of water from Mile 8.3R.
- d One 8" unit formerly listed at Mile 8.25R was moved to Mile 8.3R in 1959.
- e Includes 218 acres of Amen lands and 140 acres of Peabody lands.
- f This acreage also received 2192 acre-feet of water from Willow Slough.
- g Includes 140 acres outside of Woodland Farms, Incorporated and 555 acres of duck club lands.
- h Includes 525 acres outside of Woodland Farms, Incorporated and 35 acres reused for duck club lands.
- i Combined acreage for Miles 13.1R and 13.25R.
- j 40 Acres of rice and 62 acres of general crops listed for Mile 14.1L were irrigated by 3986 acre-feet of water from Mile 16.0L.
- k This acreage also received an undetermined amount of controlled drainage water.
- m 80 acres listed for Mile 18.45L also received an undetermined amount of water from Mile 18.2L.
- n 40 acres of rice listed for Mile 19.6L (0.05S) also received an undetermined amount of water from Mile 18.7L for flooding only.

* Mile 19.6L Cross Canal. Distance from Sacramento River and bank are shown in parentheses.
 a 40 acres of rice listed for Mile *(0.055) also received an undetermined amount of water from Mile 18.7L for flooding only.
 b This acreage also received an undetermined amount of well water.
 c Combined acreage for Miles *(3.3N) and *(3.35N).
 d Formerly listed as Roy C. Osterli, Harlan Van Dyke and Orlan Van Dyke.

e The 14" unit was installed in 1959.
 f New installation in 1959.
 g Plant is located on Grays Bend which is an old channel of the Sacramento River. Water in the channel is derived from seepage and a gated pipe to the Sacramento River. Distance from the river is shown in parentheses.

a Combined acreage for Mile 34.5R Sacramento River and Mile 0.3L Colusa Basin Drain.
 b The 12" unit was removed in 1959.
 c Includes 247 acres of Frank Guisti lands.
 d Replaces an 8" unit.
 e Formerly listed as Alice Reel and Mabel Green.
 f Formerly listed as C. L. Reel.
 g Includes 15 acres of Buell Ranch lands.
 h Includes 296 acre-feet delivered to River Farms Company as follows: April 108, May 25, June 52, July 71, August 35 and September 5.
 i Includes 150 acres of River Farms Company lands.
 j Combined acreage for Miles 44.2L and 46.45L.
 k Formerly listed as John Clauss (Puchlin).

m Includes 143 acre-feet of water spilled into a lake.
 n Combined acreage for Miles 49.0L and 49.7L.
 p Formerly listed as Holmes and Westover Company.
 q New installation in 1959.
 r Replaces a 10" unit.
 s Replaces a 12" unit.
 t Replaces a 20" unit.
 u Includes 50 acres of duck ponds.
 v Includes 220 acres of Tucker lands.
 w Formerly listed as Lamb Brothers.
 x Formerly listed as J. A. Neilson Estate.
 y Includes 113 acres of Zumwalt lands.

- a This acreage also received 20275 acre-feet of water from plant on Colusa Basin Drain Mile 19.9L.
- b Includes 31 acres of duck ponds.
- c Includes 6094 acre feet of water served to lands in Reclamation District 1660 as follows: April 683, May 1193, June 1353, July 1524, August 1157 and September 184.
- d Includes 1145 acres of general crops and 438 acres of rice in Reclamation District 1660.
- e Formerly listed as Ornbaum Livestock Company.
- f Includes 260 acres of Winship lands outside the district which received 303 acre-feet as follows: May 8, June 73, July 157 and August 65.
- g New installation in 1959.
- h Includes 41 acres of Rohleder lands.
- i Includes 20 acres of Coffman lands.
- j Includes 18 acres of Albertson lands.
- k Formerly listed as San Juan Ranch.
- m Combined acreage for plants at Miles 78.15R, 78.75R and 78.8R.
- n Includes 30 acres of Gavis lands, 30 acres of Lemos lands and 29 acres of Staats lands.
- p Includes 50 acres of S. Burtis lands.
- q An additional 2076 acres of general crops and 127 acres of rice were irrigated by controlled drainage.
- r A 12" unit was removed in 1959.
- s Includes 170 acres of duck ponds and 200 acres reused for duck ponds. This acreage also received an undetermined amount of water from Butte Creek Mile 4.3R.

- a Formerly listed as I. C. Zumwalt.
- b Combined acreage for Miles 92.6R and 93.0R.
- c Includes 20 acres of Mayfair Packing Company lands and 10 acres of W. N. Halsey lands.
- d Includes 154 acres of Monsen Estate lands.
- e The 20" unit was installed in 1959.
- f Includes 22 acres of J. C. Griffin lands.
- g Formerly listed as J. L. Erisey.
- h This plant replaces the plant previously listed at Mile 99.2L.
- i Formerly listed as Guy M. Morse and George A. Packer.
- j Includes 5 acres of I. G. Zumwalt Company duck club lands.
- k One 20" unit was installed in 1959.
- m The acreage listed for Mile 103.8R also received 149 acre-feet of water from Colusa Basin Drain Mile 48.7L (0.2).
- n The 3" unit was installed in 1959.
- p Includes 539 acres of rice and 65 acres of general crops outside the district.
- q Includes 2851 acres of rice and 3224 acres of general which also received 3627 acre-feet from Butte Creek Mile 14.4R(0.2) and 21562 acre-feet from Butte Creek Mile 11.8R (2.6). Of these acreages 1261 of rice and 1400 of general crops were reused for duck ponds.
- r Combined acreage for Miles 112.4R and 123.9R and plant on Colusa Basin Drain Mile 54.2L.
- s Includes 129 acres which received 516 feet of water from Mile 134.8R.

- a Formerly listed as R. W. Gebicke.
- b Previously listed as Mile 115.9L
- c New installation in 1959.
- d Combined acreage for Miles 112.4R and 123.9R and plant on Colusa Basin Drain Mile 54.2L.
- e 104 acres of rice listed for Glenn-Colusa Irrigation District plant at Mile 154.8R received 800 acre-feet of water from Mile 124.2R.
- f The acreage listed for Princeton-Codora-Glenn Irrigation District plant at Mile 112.4R received 2702 acre-feet of water from Mile 124.2R.
- g Combined acreage for Mile 124.2R and plants on Colusa Basin Drain at Miles 57.5 (2.4), 61.2R (1.5), 62.8L (2.5), 64.2R (0.1), and 64.2R (2.6).
- h 51 acres of general crops listed for Mile 124.2R received 250 acre-feet of water from Jacinto Irrigation District plant at Mile 154.75R.
- i Includes 72 acres of duck ponds.
- j Includes 72 acres reused for duck ponds.
- k 448 acres of rice listed for Mile 124.2R received 3600 acre-feet of water from Glenn-Colusa Irrigation District plant at Mile 154.8R.
- m This acreage also received an undetermined amount of well water.
- n An additional 22831 acre-feet were received from Butte Creek as follows: November 1016, December 1294, January 243, March 91, April 4660, May 4673, June 2830, July 2327, August 2204, September 1436 and October 2057.
- p Includes acreage as follows: M & T Incorporated - general 829, rice 842; Parrott Investment Company - general 1750, rice 1205.
- q Formerly listed as Frank C. Brazell.
- r The 4" unit was installed in 1959.
- s Combined acreage for Miles 149.7L and 150.0L.
- t Formerly listed as C. E. Warne.
- u Includes 3 acres which also received an undetermined amount of well water.
- v Quantities shown are diversions at Mile 154.75R to Glenn-Colusa Irrigation District canal.
- w Four 44" units were installed in 1959.
- x One 48" unit was removed in 1959.
- y One 54" unit was installed in 1959.
- z An additional 10382 acre-feet diverted by gravity from Stony Creek as follows: November 1, January 3260, March 3150, April 3720, May 251.
- aa An additional 4074 acre-feet diverted by plant on Colusa Basin Drain at Mile 29.8R (1.4). Includes 516 acre-feet served to 129 acres of general, listed for Mile 112.4R. 448 acres of rice, listed for Mile 124.2R received 3600 acre-feet of water from Glenn-Colusa Irrigation District Plant at Mile 154.8R.
- ab This acreage also received an undetermined amount of water by controlled drainage. Of this acreage, 1379 was reused for duck ponds. Includes the following acreage outside the district: general 687 and rice 677.
- ac Formerly listed as J. Ewert.
- ad Includes 4 acres of Ewit lands.
- ae Nonagricultural use.
- af Combined acreage for Miles 168.85R and 168.9R.
- ag Formerly listed as Diamond Match Company.
- ah Combined acreage for Miles 198.0L and 198.3L.

* Carries return water from Colusa Basin along west border at Reclamation Districts 108 and 787 and then discharges to Sacramento River at Mile 34.15R or partial diversion via Knights Landing Ridge Cut.
 ** Mileage along Colusa Basin Drain from junction with Sacramento River.
 a Combined acreage for Mile 34.5R Sacramento River and 0.3L Colusa Basin Drain.
 b Includes 6 acres reused for duck ponds.
 c This acreage also received an undetermined amount of well water.
 d The 24" unit was installed in 1959.
 e The acreage listed for Mile 4.35R also received an undetermined amount of water from Mile 7.2R.
 f Includes 69 acres of duck ponds.
 g Includes 60 acres of duck ponds.
 h This acreage was used for duck ponds only.
 i Combined acreage for Mile 18.5R (0.8) and 20.0R.
 j Combined acreage for Mile 63.2R Sacramento River and Mile 19.9L Colusa Basin Drain.
 k Formerly listed as William West.
 m Includes 50 acres reused for duck ponds.
 n Includes 400 acres of Tuttle lands.
 p This water was served to acreage listed for Mile 154.8R Sacramento River and includes an undetermined amount of water returned to Colusa Basin Drain by spill.

q All duck refuge lands.
 r All duck club lands.
 s Includes 60 acres reused for duck ponds.
 t The 14" unit was a temporary installation during 1959.
 u Formerly listed as I. D. Zumwalt.
 v Includes 428 acres of duck ponds.
 w Includes 100 acres of Hahn lands.
 x Includes 423 acres of Hahn lands.
 y Includes 509 acres of Coffman lands.
 z The acreage listed for Sacramento River Mile 103.8R also received 149 acre-feet of water from Mile 48.7L(0.2).
 aa This acreage received an undetermined amount of water from Stone Corral Creek.
 ab Includes 800 acres reused for duck ponds.
 ac Includes 35 acres reused for duck ponds.
 ad Includes 117 acres reused for duck ponds.
 ae The 8" unit was a temporary installation during 1959.
 af See plant on Sacramento River at Mile 112.4R.
 ag This acreage reused for duck ponds.
 ah This water was served to acreage listed for Mile 124.2R Sacramento River.
 ai Replaces plant previously listed as Mile 58.4L.
 aj Includes 5 acres of duck ponds.
 ak Combined acreage for Mile 63.7L and 64.1L.
 am Stock water.

- * Mileage on Butte Creek from junction with Butte Slough at Mile 0.6E.
- ** Mileage on Butte Slough from junction with Sacramento River at Mile 84.0L.
- a Includes 100 acres reused for duck ponds and 500 acres of duck club lands which also received an undetermined amount of controlled drainage water.
- b Includes an undetermined amount of water served to the acreage listed for Sacramento River Mile 89.25L.
- c Includes 305 acres of duck ponds and 770 acres which were reused for duck ponds.
- d Combined acreage for Miles 11.8R and 11.8R(0.5). All acreage was reused for duck ponds.
- e The acreage listed for Sacramento River Mile 112.1L also received 21562 acre-feet of water from Butte Creek Mile 11.8R(2.6).
- f The acreage listed for Sacramento River Mile 112.1L also received 3627 acre-feet of water from Butte Creek Mile Opp. 14.4R(0.2).
- g All duck club lands.
- h Formerly listed as Murdock Land Company.
- i Includes 50 acres reused for duck ponds.
- j One 16" unit was a temporary installation during 1959.
- k This acreage also received an undetermined amount of well water.
- m A 14" and on 16" unit were temporary installations during 1959.
- n This acreage also received an undetermined amount of controlled drainage water.
- p Replaces an 8" unit.
- q Flow in Butte Slough, derived from Butte Creek, is controlled by outfall gates at junction with Sacramento River and is thereby retained in Butte Slough to discharge into East and West Borrow Pits of Sutter Bypass near "Long Bridge". The Outfall Gates are maintained by the Department of Water Resources and are operated cooperatively with the Butte Slough Irrigation Company. See Sutter Bypass Diversions.
- r Includes 119 acres of Joe Marty land.
- s Combined acreage for Miles 0.9E and 1.4E.
- t Replaces a 6" unit.
- u Includes 77 acres of C. Reische lands.
- v Includes 220 acres of Hankins lands.
- w Reinstallation in 1959 of a plant previously removed.

- * Mileages on West Borrow Pit are given northerly from drain plant of Reclamation District 1500. Mile 9.15 on West Borrow Pit is opposite Chandler.
- ** Mileages on East Borrow Pit are given northerly or southerly from Chandler.
- *** Mileages on Sacramento Slough are given easterly from drain plant of Reclamation District 1500 which is at head of slough.
- † Plant is on the main drainage canal for Drainage Plant 1 that joins East Borrow Pit of Sutter Bypass at Mile 1.4N. Figure in parentheses indicates distance along drain from East Borrow Pit.
- †† Plant is on drainage canal for Drainage Plant 2 that joins East Borrow Pit of Sutter Bypass at Mile 16.7N. Figure in parentheses indicates distance along drain from East Borrow Pit.
- ††† Plant is on Wadsworth canal that joins East Borrow Pit of Sutter Bypass at Mile 16.5N. Figure in parentheses indicates distance along canal from East Borrow Pit.
- †††† Plant is on Foodle Creek that joins East Borrow Pit of Sutter Bypass at Mile 16.7N. Figure in parentheses indicates distance along creek from East Borrow Pit.
- a Water used for irrigation in Sutter Bypass is mainly Feather River return water that enters East and West Borrow Pits via Butte Creek, Butte Slough and Wadsworth Canal.
- b Indicates area irrigated is within bypass.
- c Includes 105 acres reused for duck ponds.
- d Combined acreage for Miles 25.0R and 28.4R.
- e Formerly listed as Frye Brothers.
- f A 14" unit was removed in 1959.
- g New installation in 1959.
- h 430 acres of rice listed for Mile 8 (1.75) also received an undetermined amount of water from Mile 8 (1.45).
- i Combined acreage for Miles 8 (1.45) and 8 (4.1).
- j Combined acreage for Miles 8 (3.5) and 8 (3.9). This acreage was double cropped.
- k Formerly listed as Leona Hughes.
- m Includes 160 acres of J. R. Ham Lands.
- n One 10" unit was installed in 1959.
- p Includes 20 acres of duck ponds.
- q Combined acreage for Miles 7.1N and 88 (2.5).
- r Includes 35 acres reused for duck ponds.
- s 125 acres of general crops listed for Mile 9.99N also received an undetermined amount of water from Mile 10.0N.
- t All duck club lands.
- u See plant on Feather River Mile 38.1R.
- v One 12" unit was installed in 1959.
- w All duck refuge lands.
- x Reused for duck ponds.
- y Stock water.
- z Formerly listed as H. T. and H. D. Brown.
- aa Replace a 10" and a 12" unit.
- ab Combined acreage for Miles W (1.35R) and W (1.36). Includes 87 acres of A. H. Muns lands and 16 acres of Vesper Kellogg lands.
- ac Combined acreage for Miles W (2.5R) and W (2.51R).
- ad Previously listed as Mile W (2.5R).
- ae A 10" unit was removed in 1959.
- af One 14" unit was removed in 1959.
- ag The 14" unit was a temporary installation during 1959.
- ah All R. Stohman lands.
- ai Includes 20 acres reused for duck clubs.
- aj Includes acreage as follows: Epperson 235, Middleton 135, Nail 105, Madden 98, M. DeWitt 48, C. and L. DeWitt 55, and Myers 47.

* Plant is located on Honcut Slough which diverts Feather River water backed into slough. Mouth of Honcut Slough is at Mile 43.7L. Distance from Feather River and bank are shown in parentheses.
 a New installation in 1959.
 b This acreage also received an undetermined amount of well water.
 c Includes 20 acres which also received an undetermined amount of well water.
 d New installation in 1958.
 e All duck club lands.
 f Includes 15 acres which also received an undetermined amount of well water.
 g Includes 260 acres which also received 480 acre-feet of well water.
 h Formerly listed as Ray Chandler.
 i Acreage listed for Mile 33.9R also received an undetermined amount of water from Mile 33.3R.
 j Combined acreage for plant at Mile 38.1R, the Sutter Extension Water District diversion at Mile 58.1R and the plants on Sutter By-Pass, East Borrow Pit at Mile 10.0N (2.0) and (6.7).
 k This acreage also received an undetermined amount of controlled drainage water.
 m 30 acres listed for Mile 47.4L also received an undetermined amount of water from Mile 47.9L.
 n Includes 200 acres which also received an undetermined amount of well water.
 p 61 acres listed for Mile 48.0L also received an undetermined amount of water from Mile 48.3L.
 q Formerly listed as S. T. Machado.
 r The 5" unit was temporarily installed in 1959.
 s All Chambers lands.
 t This is a common point of diversion for Butte Water District, Biggs - West Gridley Water District, Richvale Irrigation District and Sutter Extension Water District. In 1959 and all subsequent years the diversion will be reported as total diversion with no breakdown as to amounts to each district.
 u This figure includes 12,639 acres of general crops and 1,713 of rice for Butte Water District, 4684 acres of general crops and 8069 acres of rice for Biggs - West Gridley Water District, and 965 acres of general crops and 11,655 acres of rice for Richvale Irrigation District. See Mile 38.1R for Sutter Extension Water District acreage.
 v Includes 8176 acre-feet in November, 11935 acre-feet in December, 1160 acre-feet in January, 1993 acre-feet in September and 17,381 acre-feet in October for duck water.

a Replaces a 10" unit.
 b This acreage also received an undetermined amount of well water.
 c A 4" unit was removed in 1959.
 d Combined acreage for Miles 4.75L and 5.15L.
 e New installation in 1959.
 f Plant moved from Mile 6.2L in 1959.
 g Replaces 1-12" unit.
 h Of this acreage, 33 was reused for duck clubs.
 j Of this acreage, 780 was reused for duck clubs.
 k Includes 297 acres outside district and 110 acres reused for duck ponds.
 m Includes 124 acres outside district and 2227 acres reused for duck ponds.

* Diversions shown in this table below the Woodbridge Gaging Station are considered as Delta Uplands Diversions. Left bank diversions into Reclamation District 348 (below Mile 9.8) and right bank diversions into McCormack-Williamson Tract (below Mile 3.5) are not included since these areas are considered to be within the Delta Lowlands. Tidal effect ceases at about Mile 10.5.

** Mile and Bank above New Hope Bridge.

a This acreage also received an undetermined amount of water from Dry Creek.

b Installed prior to 1959. Not previously listed.

c Includes 503 acres outside the District and 4586 acres of the Woodbridge Water Users Conservation District.

d Formerly listed as Nora E. Mumbert.

e This acreage also received an undetermined amount of well water.

f Formerly listed as Hirschenmann and Mettler.

g Formerly listed as Vasco Mencarini.

h Replaces a 1" unit.

i New installation in 1959.

j This acreage received its main source of water from wells and controlled drainage.

k Formerly listed as Red Checker Land Company.

m Replaces plant previously listed at Mile 33.75L.

n Includes 25 acres of Draffigna lands.

p Formerly listed as H. C. Russell.

q Includes 155 acres which also received an undetermined amount of well water.

r Formerly listed as E. M. Locke.

s Combined acreage for Mile 35.5R and 36.2R.

t Includes 127 acres which also received an undetermined amount of well water.

u Reinstallation in 1959 of a plant previously removed.

v Formerly listed as O. Parker.

* Diversions shown in this table below the Stockton Gaging Station are considered as Delta Uplands Diversions. Right bank diversions below Mile 2.0 and left bank diversions below Mile 0.7 are not included since they serve areas that are considered to be within the Delta Lowlands. Tidal effect ceases at about Mile 5.0.

** North Slough - North Slough diverts from Calaveras River at Mile 21.6R. Distance from Calaveras River and bank are shown in parentheses.

† Mormon Slough - Mormon Slough diverts from Calaveras River at Mile 25.3L and rejoins the river through Stockton Diverting Canal. Distance from Calaveras River and bank are shown in parentheses.

‡ Stockton Diverting Canal diverts from Mormon Slough at Mile 8(13.0) and rejoins the Calaveras River at Mile 5.4L. Distance from Calaveras River and bank are shown in parentheses.

a This acreage also received an undetermined amount of well water.

b New installation in 1959.

c Includes 7 acres which also received an undetermined amount of water from Woodbridge Irrigation District.

d Combined acreage for Miles 11.82L and 11.85L.

e Combined acreage for Miles 11.85R and 11.95R.

f Combined acreage for Miles 11.95L, 12.0L and 12.05L.

g Combined acreage for Miles 12.1L and 12.15L.

h Combined acreage for Miles 12.35L and 12.6L.

i Includes 10 acres of V. Freggiaro lands.

j Combined acreage for Miles 12.43R and 12.45R.

k Combined acreage for Miles 15.4R and *(6.1L).

m Installed prior to 1959. Not previously listed.

n Formerly listed as E. F. Messick.

p Includes an undetermined amount of controlled drainage water.

q Includes 92 acres which also received an undetermined amount of well water.

r Includes 146 acres which also received an undetermined amount of well water.

s Includes 10 acres of Miller lands and 10 acres of Heath lands.

t Combined acreage for Miles 24.3L and 24.4L.

u Formerly listed as J. E. Ryburn.

v Includes 75 acres of P. L. Leonard's lands.

w Includes 15 acres of S. M. Canepa lands.

x 6 acres listed for Mile 8(6.3L) also received an undetermined amount of water from Mile 8(7.2L).

y Includes 55 acres which also received an undetermined amount of well water.

z Plant moved from Mile 8(10.8R) in 1959.

aa Replaces a 7" unit.

ab Includes 4 acres of C. Logan lands and 4 acres of P. Gogna lands.

ac Formerly listed as Homer D. Riddle.

ad Formerly listed as L. F. Gramsley.

ae Replaces a 6" unit.

af Includes 65 acres of Roy Gregory lands and 23 acres of Emmet Gregory lands.

ag Replaces a 5" unit.

- * Mileage along Old River from mouth of San Joaquin River 4 1/2 miles below Antioch.
- ** Mileage along Tom Paine Slough from its mouth at Mile 54.3L on Old River.
- *** Mile and bank above mouth.
- B Holly Sugar Corporation Dredger Cut joins Tom Paine Slough at Mile 2.1S. Distance along Dredger Cut and bank are shown in parentheses.
- a Rock Slough joins Old River at Mile 30.5L. Pumping plant is located on channel which joins Rock Slough.
- b Includes 27 acres of G. P. Mercer lands.
- c Indian Slough joins Old River at Mile 36.5L. Pumping plant is located on Intake Canal which joins Indian Slough.
- d Includes double cropped acreage. This acreage also received 3522 acre-feet of well water.
- e Italian Slough joins Old River at Mile 40.9L. Pumping plant is located on Intake Canal which joins Italian Slough.
- f Includes an undetermined amount of acreage which also received an undetermined amount of controlled drainage water. Of this acreage, 867 were double cropped.
- g Plant is located on Intake Canal which joins the Old River at this mile.
- h Plant is located on Mountain House Creek which joins the Old River at this mile.
- i This acreage also received an undetermined amount of water from Mountain House Creek.
- j This acreage also received 3418 acre-feet of well water. Include 125 acres of outside contract lands. Of this acreage, 675 were double cropped. This acreage also received 2848 acre-feet of Delta-Mendota Canal water as follows: March 410, April 891, June 317, July 919 and August 311.
- k Includes 20 acres irrigated outside the district.
- m 100 acres listed for Mile 1.5S also received an undetermined amount of water from Mile 0.7S.
- n This acreage also received an undetermined amount of Holly Sugar Corporation factory waste water.
- p Of this acreage, 27 were double cropped.
- q 8 acres listed for Mile 1.4L also received an undetermined amount of water from Mile 1.45L.
- r Plant moved from Mile 1.5L in 1959.
- s Of this acreage, 8 were double cropped.

- * Mileage along San Joaquin River from its mouth 4 1/2 miles below Antioch.
- a Includes an undetermined amount of water returned to river by spill.
- b Combined acreage for Miles 48.0R and 48.1R. This acreage also received an undetermined amount of water from controlled drainage.
- c New installation in 1959.
- d This acreage was double cropped.
- e Includes 30 acres which also received an undetermined amount of well water. Includes 30 acres of G. Calcagno lands.
- f Combined acreage for Miles 49.3R and 49.5R.
- g Includes 29 acres of Nishimura lands.
- h 125 acres listed for Mile 53.8R also received an undetermined amount of water from Mile 53.7R.
- i Formerly listed as James Tobin.
- j Formerly listed as C. Gardella and Company.
- k Formerly listed as Mertle Abersold.
- m The 4" unit was a temporary installation during 1959.
- n Plant is located on Walthall Slough which joins the San Joaquin River at this mile.
- p One 16" unit was a temporary installation during 1959.
- q Of this acreage, 100 were double cropped.
- r Plant is located on Paradise Cut which joins the San Joaquin River at this mile.
- s One 14" unit was a temporary installation during 1959.
- t Plant is located on intake canal which joins the San Joaquin River at this mile.
- u Includes 811 acres of Banta Irrigated Farms, 579 acres of Kasson District, and 1127 acres of outside contracts. Of this acreage, 1196 were double cropped. Portions of this acreage also received an undetermined amount of well water. This acreage also received 2790 acre-feet of Delta-Mendota Canal water as follows: March 29, April 1270, July 886 and August 605.
- v Formerly listed as Glenn M. West.
- w Includes 261 acres which also received an undetermined amount of controlled drainage water.
- x Recreational lakes. Also received an undetermined amount of controlled drainage water.
- y Includes 227 acres which also received an undetermined amount of controlled drainage water.

* Figures represent North Townships, East Ranges, and Sections. Letters represent the 1/4 portion of the section.
 a Formerly listed as H. Moffat Company and Eldon Land Company.
 b Includes 549 acre-feet of water received by sub-irrigation.
 c Combined acreage for two plants at 4/5-28B.
 d This acreage also received an undetermined amount of water from the Woodbridge Irrigation District and was reused for duck club lands.
 e The 5" unit and the 6" unit replace a 4" unit.
 f Plant moved from 6/5-31R.
 g One 12" unit was removed in 1959.
 h All duck club lands.

i Includes 1562 acres outside the district and 220 acres of duck clubs.
 j Of this acreage, 30 were reused for duck clubs.
 k Of this acreage, 38 were reused for duck clubs.
 m This acreage also received an undetermined amount of water from the Woodbridge Irrigation District.
 n Diversion for 1959 was all controlled drainage water.
 p Includes 80 acres of duck club lands.
 q Combined acreage for 6/3-19E and 6/3-30D.
 r Estimated consumptive use of lands in Delta Uplands considered as sub-irrigated from tidal channels during 1959 without a specific point of diversion.

- * Mileage along San Joaquin River from its mouth 4.5 miles below Antioch.
- ** West Stanislaus Irrigation District intake canal. The intake canal joins the San Joaquin River at Mile 91.8L. Distance from San Joaquin River and bank are shown in parentheses.
- 8 Plant is located on old channel which joins the San Joaquin River at this mile
- a Formerly listed as A. J. Chisholm.
- b Of this acreage, 75 were double cropped.
- c Includes 50 acres of Chisholm lands.
- d Includes 532 acres which also received an undetermined amount of controlled drainage water.
- e Includes an undetermined amount of water returned to river by spill.
- f This acreage also received an undetermined amount of controlled drainage water. Includes 385 acres which also received an undetermined amount of well water.
- g Includes 69 acres which also received an undetermined amount of controlled drainage water.
- h This acreage also received 27000 acre-feet of Delta-Mendota Canal water as follows: April 3983, May 717, June 5664, July 7959, August 6272, September 1870 and October 535. Of this acreage 1046 were double cropped. Includes 1984 acres irrigated outside the district and 22 acres of Banta Carbona Irrigation District lands. Portions of this acreage also received an undetermined amount of well water.
- i Combined acreage for Miles *(0.7W) and *(1.1N).
- j Includes 135 acres which also received an undetermined amount of controlled drainage water.
- k Includes 20 acres which also received an undetermined amount of controlled drainage water.
- m Includes 40 acres which also received an undetermined amount of controlled drainage water.
- n This acreage also received an undetermined amount of Turlock Irrigation District water.
- p Formerly listed as Bostick Brothers.
- q Of this acreage, 20 were double cropped.
- r Includes an undetermined amount of water diverted to slough for recreational use.
- s This acreage also received an undetermined amount of well water
- t 305 acres of rice listed for Mile 109.8L also received an undetermined amount of water from Mile 104.4L.
- u Of this acreage, 1521 were double cropped. This acreage also received 3559 acre-feet of Delta-Mendota Canal water as follows: November 169, March 432, April 595, May 460, June 532, July 565, August 570 and September 236. Includes 52 acres which also received an undetermined amount of well water.
- v Of this acreage, 448 were double cropped.
- w Includes 32 acres which also received an undetermined amount of Turlock Irrigation District water.
- x Of this acreage, 50 were double cropped.
- y Installed prior to November 1958. Not previously listed.
- z Of this acreage, 15 were double cropped.
- aa The 4" unit was installed in 1959.
- ab New installation in 1959.
- ac The acreage listed for Mile 121.3R San Joaquin River also received an undetermined amount of water from Mile 3.8R Merced River. 125 acres listed for Mile 121.3R San Joaquin River were previously listed for Mile 3.8R Merced River.

* Mileage along San Joaquin River from its mouth 4.5 miles below Antioch.
 ** Plant is located on Sand Slough which diverts from San Joaquin River at Mile 168.4R. Distance from San Joaquin River and bank are shown in parentheses.
 † Plant is located on Fresno Slough which diverts from San Joaquin River at Mile 209.0L. Distance from San Joaquin River and bank are shown in parentheses.
 ‡ Plant is located on James Bypass which diverts from Fresno Slough at Mile 8 (11.80R). Distance from Fresno Slough and bank are shown in parentheses.
 § No record. Plant will not be reported in subsequent reports.

b 185 acres listed for Mile 161.9R also received an undetermined amount of water from Mile 161.4R.
 c This is a portable unit which diverts water at Miles 162.9R and 163.2R.
 d 49 acres listed for Mile 163.2R also received 88 acre-feet of water from Mile 162.9R.
 e Previously listed as a 12" unit.
 f Central California Irrigation District plants at Miles 169.95L and 185.6L supplement gravity supply.
 g Data furnished by U. S. Bureau of Reclamation.
 h This acreage also received an undetermined amount of well water.
 i Formerly listed as Traction Ranch.

- * Mileage along San Joaquin River from its mouth 4.5 miles below Antioch.
- ** Point of diversion and place of use is on island in midstream.
- a Formerly listed as W. A. Koehergen.
- b This acreage was double cropped.
- c New installation in 1959.
- d Domestic use.
- e The 4" unit was a temporary installation in 1959. The 8" unit was installed in 1959.
- f This acreage also received an undetermined amount of well water.
- g Of this acreage, 43 were double cropped.
- h Formerly listed as Dewey W. Johnson.
- i Includes 5 acres of Santa Fe Vintage Company vineyards, formerly listed as Morello Winery. This acreage also received an undetermined amount of Fresno Irrigation District water.
- j Installed prior to November 1958. Not previously listed.
- k The acreage also received an undetermined amount of Madera Irrigation District water.
- m This acreage also received an undetermined amount of Fresno Irrigation District water.
- n Includes 36 acres which also received an undetermined amount of well water.
- p Replaces a 4" unit.
- q Formerly listed as Emma Pappas 1.
- r Formerly listed as Emma Pappas 2.
- s Includes 35 acres of J. E. Cobb lands.
- t Combined acreage for Miles 258.80L and 258.90L.
- u R. C. Arnold 1 and R. C. Arnold 2 were formerly a combined listing as R. C. Arnold.
- v Formerly listed as E. C. Rank.
- w Formerly listed as R. C. Arnold.
- x 50 acres listed for Mile 262.27L also received an undetermined amount of water from Mile 262.32L.
- y Includes 32 acres which also received an undetermined amount of well water.
- z 20 acres listed for Mile 262.60R also received an undetermined amount of water from Mile 263.40R.
- aa Of this acreage, 42 were double cropped.
- ab Formerly listed as Pacific Coast Aggregate Company.
- ac Plant is located on pond whose major source of supply is from the Pacific Cement and Aggregate Company plant at this mile.
- ad Replaces a 7" unit.
- ae Replaces a 5" unit.

- a Replaces a 20" unit.
- b The acreage listed for Mile 121.3R San Joaquin River also received an undetermined amount of water from Mile 3.8R Merced River.
- c 125 acres listed for Mile 121.3R San Joaquin River were previously listed for Mile 3.8R Merced River.
- d Of this acreage, 36 were double cropped.
- e Of this acreage, 217 were double cropped. This acreage also received an undetermined amount of water from East Side Canal.
- f Of this acreage, 87 were double cropped.
- g Of this acreage, 13 were double cropped.
- h Installed prior to November 1958. Not previously listed.
- i Of this acreage, 10 were double cropped.
- j Of this acreage, 98 were double cropped.
- k Of this acreage, 44 were double cropped.
- m Formerly listed as Claude Hayes.
- n Combined acreage for Miles 11.6L, 12.35L and 12.85L.
- p New installation in 1959.
- q 42 acres listed for Mile 11.65R also received an undetermined amount of water from Mile 12.0R.
- r Includes 42 acres which also received an undetermined amount of controlled drainage water from Turlock Irrigation District.
- s Formerly listed as M. Turner.
- t Plant moved from Mile 11.7R in 1959.
- u Of this acreage, 26 were double cropped.

- v Of this acreage, 12 were double cropped.
- w This acreage also received an undetermined amount of well water.
- x Includes 16 acres of McKelvey lands. Includes 8 acres which also received an undetermined amount of well water. Of this acreage, 8 were double cropped.
- y Formerly listed as S. Magsalay.
- z Formerly listed as J. H. Thomas.
- aa Of this acreage, 16 were double cropped.
- ab This acreage was double cropped.
- ac Includes 177 acres which also received an undetermined amount of well water.
- ad This is a portable unit which diverts water at Miles 23.0L, 23.1L and 23.2L.
- ae Plant moved from Mile 23.4L in 1959.
- af The 3" unit was replaced by a 6" unit during 1959.
- ag The 3" unit was installed in 1959.
- ah Replaces a 5" unit.
- ai This acreage also received an undetermined amount of water from Merced Irrigation District.
- aj Of this acreage, 32 were double cropped. Includes 35 acres which also received an undetermined amount of well water.
- ak 282 acres listed for Mile 36.9L also received 318 acre-feet of water from Mile 32.3L. Of this acreage, 33 were double cropped.
- am Replaces a 6" unit.
- an Of this acreage, 163 were double cropped.

- a Formerly listed as A. J. Chisholm and C. M. Carroll.
- b Two 12" units previously listed as Overton Ranch (Koetitz and Faith Ranch) at Mile 3.4L are now listed for Faith Ranch at Mile 3.4L.
- c The acreage listed for Mile 4.7L also received 850 acre-feet of water from Mile 3.4L.
- d Includes 330 acres which also received an undetermined amount of controlled drainage water.
- e Includes an undetermined amount of water returned to river by spill.
- f The acreage listed for Mile 4.05R also received an undetermined amount of water from Mile 4.0R.
- g Of this acreage, 135 were double cropped. 23 acres also received an undetermined amount of controlled drainage water.
- h Of this acreage, 88 were double cropped.
- i New installation in 1959.
- j The 2" unit was installed in 1959.
- k Of this acreage, 38 were double cropped.
- m Of this acreage, 155 were double cropped.
- n The acreage listed for Mile 10.0R also received an undetermined amount of water from Mile 10.5R.
- p Installed prior to November 1958. Not previously listed.
- q Includes 217 acres which also received an undetermined amount of water from Modesto Irrigation District.
- r Of this acreage, 54 were double cropped.
- s Formerly listed as Allen Ranch.
- t Replaces a 5" unit.
- u This is a portable unit which diverts water between Miles 24.2L and 25.8L.
- v Includes 30 acres which also received an undetermined amount of well water and 49 acres which also received an undetermined amount of slough water.
- w Bridge relocated in 1959.
- x Previously listed as Mile 29.6L.
- y Oakdale Irrigation District for season of 1959 maintained plants at Miles 37.7L and 39.1L to supplement district gravity supply.
- z Of this acreage, 110 were double cropped. 288 acres also received an undetermined amount of water from Stanislaus River, Mile 58.6, the District gravity diversion.
- aa Of this acreage, 115 were double cropped. This acreage also received an undetermined amount of water from Stanislaus River, Mile 58.6, the District gravity diversion.
- ab Formerly listed as J. S. Nardin.
- ac Formerly listed as Walter B. Wilms.

- a Flow measured at gaging station on Pioneer Ditch located approximately 1.0 mile below head.
- b This acreage also received an undetermined amount of well water.
- c 14 acres listed for Mile 2.6L also received an undetermined amount of water from Mile 1.5L.
- d Flow measured at gaging station on Campbell-Moreland Ditch located approximately 2600 feet below head.
- e Includes an undetermined amount of water served to Vandalia Irrigation District well fields.
- f 1027 acre-feet of water flowed into Porter Slough as follows: November 316, December 176, January 198, February 143, March 78, April 21, May 94, June 1.
- g Flow measured at gaging station on Porter Slough Ditch located approximately 150 feet below head.
- h An undetermined amount of water was supplied to a sinking basin.
- i Flow measured at gaging station on Vandalia Ditch located approximately 1000 feet below head.
- j The greater portion of this water was used to recharge Vandalia Irrigation District well field from which 1269 acres were irrigated.
- k Flow measured at gaging station on Poplar Ditch located approximately 4750 feet below head.
- m Irrigated acreage unavailable.
- n Flow measured at gaging station on Hubbs-Miner Ditch located approximately 3400 feet below head.
- p Includes 982 acres in the Hubbs-Miner Ditch Company and 272 acres in the Gilliam-McGee Ditch Company.
- q Flow measured at gaging station on Rhodes-Fine Ditch located approximately 3100 feet below head.
- r Flow measured at gaging station on Woods-Central Ditch located approximately 100 feet below head.
- s 727 acre-feet of water flowed into the Tule River as follows: December 260, January 176, February 43, March 94, April 28, May 26.

* Data furnished by water users and rounded according to criteria applied by the Department.
 a An additional 131700 acre-feet of water was pumped from wells.
 b Of this acreage, 4443 was double cropped. Does not include an undetermined amount of riparian water users acreage.
 c An additional 137800 acre-feet of water was pumped from wells.
 d Of this acreage, 22571 was double cropped.
 e An additional 105788 acre-feet of water was pumped from wells.
 f Of this acreage, 9646 was double cropped.
 g Of this acreage, 150 was double cropped.

h Of this acreage, 437 was double cropped.
 i Of this acreage, 165 was double cropped.
 j Includes 794 acres listed for Miles 35.9L and 37.0L on the Stanislaus River. This acreage also received 49126 acre-feet of water from wells and controlled drainage.
 k This acreage also received an undetermined amount of well water, and an undetermined amount of controlled drainage water from Oakdale Irrigation District. Of this acreage, 5590 was double cropped. Includes 1924 acres served by sub-irrigation.

TABLE 225
DESCRIPTION OF ACTIVE SALINITY OBSERVATION STATIONS
1959 Water Year

Station	Miles from Golden Gate (a)	Time Interval (b)		Location
		Hours	Mins.	
SAN FRANCISCO, SAN PABLO, AND SUISUN BAYS				
Point Pinole	19.0	2	50	South shore of San Pablo Bay, at Point Pinole on wharf of Atlas Powder Company.
Crockett	27.7	3	30	West end of Carquinez Strait, south shore, 0.2 mile east of Carquinez Bridge on wharf of C. and H. Sugar Refining Corporation.
Benicia	32.5	3	50	East end of Carquinez Strait, north shore, 1.1 mile west of Southern Pacific Company railroad bridge at Benicia Arsenal.
Martinez	32.7	3	50	East end of Carquinez Strait, south shore, 1.0 mile west of Southern Pacific Company railroad bridge at Municipal Ferry Slip. (Bulla Head Point.)
West Suisun	37.0	4	10	West end of Suisun Bay, north shore, 2.5 miles northeast of Southern Pacific railroad bridge at service pier of U. S. Maritime Commission, Reserve Fleet mooring area.
Innisfail Ferry	47.3	4	50	Montezuma Slough, about one mile east of junction with Cutoff Slough near north end of Grizzly Island.
Port Chicago	41.0	4	20	South shore of Suisun Bay at U. S. Naval ammunition loading wharf below Port Chicago.
Spoonbill Creek	48.9	5	10	At Sacramento Northern Railroad Crossing.
Pittsburg	48.0	5	00	East end of Suisun Bay, south shore, at Pittsburg Yacht Harbor.
SACRAMENTO RIVER DELTA				
Collinville	50.8	5	25	Sacramento River, north bank at junction with San Joaquin River.
Emmaton	57.6	5	45	Sacramento River, south bank, 5.9 miles downstream from Rio Vista.
Threemile Slough Bridge	60.0	5	55	At junction of Slough and Sacramento River.
Rio Vista Bridge	63.5	6	05	At highway bridge near northerly limits of Rio Vista.
Isleton Bridge	68.7	6	30	Sacramento River, one mile upstream from Isleton.
SAN JOAQUIN RIVER DELTA				
Antioch	54.9	5	55	San Joaquin River at City Water Works pumping plant.
Antioch Bridge	58.2	6	10	South shore San Joaquin River at Antioch Bridge.
Jersey Island	61.4	6	20	San Joaquin River, left bank, one mile below mouth of False River.
Threemile Slough	64.2	6	30	Threemile Slough, west bank, of junction of slough with the San Joaquin River.
Culton Point	67.2	6	40	San Joaquin River, right bank, three miles upstream from junction of Threemile Slough.
San Andreas Landing	70.3	6	55	San Joaquin River, right bank, one mile below the mouth of the Mokelumne River.
Opposite Central Landing	72.0	7	00	Mokelumne River on Andrus Island directly opposite Central Landing on Bouldin Island.
Dutch Slough	73.0	7	05	At Bethel Island Bridge.
East Contra Costa I. D.	86.7	8	20	Indian Slough at East Contra Costa Irrigation District Pumping Plant.
Clifton Court Ferry	94.2	9	10	Old River just below junction with Grant Line Canal.
Mossdale Bridge	108.5	10	50	San Joaquin River at U. S. 50 Highway crossing about three miles southwest of Lathrop.
Vernalia	127.0	11	00	San Joaquin River at Durham Ferry Bridge above tidal influence.

a Mileage measured to station along main channel. For stations off the main channel, the mileage shown is the same distance along the main channel to a point whereon the time of the occurrence of the tidal phase is the same as that of the observation station.

b Time interval between high tide at Golden Gate and time for taking samples at station.

CENTRAL VALLEY AREA

LAHONTAN AREA

LAHONTAN AREAIntroduction

The water resources of the Lahontan Area as a whole are greatly deficient with respect to the potential development of this region; however, sufficient water resources to supply their ultimate needs do exist in a few stream basins.

Geographically, the Lahontan Area is the most extensive of the hydrographic areas. Lying along almost the entire California-Nevada border, the Lahontan Area extends from the Oregon border to the New York Mountains, within 40 miles west of the Colorado River. It includes all the drainage basins of California lying east of the Warner Mountains, the Sierra Nevada, the Tehachapi Mountains, the Portal Ridge, the San Gabriel Mountains, and the San Bernardino Mountains. It does not include areas draining into the Salton Sea and the Colorado River. All of the principal streams of the area head on the eastern slopes of the Sierra Nevada or on the San Bernardino Mountains and flow into inland lakes or sinks in California or Nevada.

Tabular Information

On the following pages are the data for 11 gaging stations for the 1959 water year.

TABLE 369
STREAM FLOW MEASUREMENTS AT MISCELLANEOUS SITES
Measurements of streamflow at points other than gaging stations or at points where flow has not been computed are listed in the following table

Lahontan Area

Stream	Tributary	Location	Measurements		
			Date	Gage Height	Discharge (c.f.e.)
Eagle Lake Tunnel nr Susanville (A)	Willow Creek		3-12-59	6.62	1.87 (B)
			4-21-59	6.64	1.97 (B)
			4-21-59	6.64	6.41 (C)

(A) Referred to Recorder Station "Eagle Lake near Susanville".
(B) Measured 150 feet below tunnel entrance.
(C) Measured 75 feet below tunnel outlet.
