PRECIPITATION RECORDS	
For season 1934-35 1 Miscellaneous 1	.09 .10 .19 .20

FOREWORD

The well records here given are a continuation of those published in Bulletins 39, 39-A, 39-B and 39-C. Descriptive data for most of the wells and maps showing their locations are given in Bulletin 39. Descriptive data for a few wells not included in Bulletin 39 are given in Bulletins 39-A, 39-B and 39-C. Records at a few additional wells are given in this bulletin and descriptive data for them are included. Some of these latter wells are not shown on the maps in Bulletin 39.

The precipitation records here given are a continuation of those published in Bulletins 39-A, 39-B and 39-C. In the former bulletin is a map showing locations of stations listed in 1932. Several additional stations and older records have also been added. Stations not shown on the map in Bulletin 39-A are described as to location. The totals are for the season July 1st to June 30th. There is a tendency on the part of the observers to neglect the minor storms, particularly those occurring at the beginning and at the end of the season. Through inspection of the records at nearby stations, the amount of precipitation so neglected has been estimated. This amount has been added to the recorded precipitation and an asterisk indicates where such an addition has been made.

Monthly totals for several precipitation stations have been added to show the distribution of rainfall in various localities.

Records of daily precipitation for most of the stations included herein are available in the office of the Division of Water Resources.

Cooperation of the agencies through which the records have been made available is appreciated. Proper credit is given in the tabulation of data for each well and in the table showing precipitation station data. sense and the sense sense a sense and the sense
